Summary	Page	Issues
----------------	-------------	---------------

⬇ 1 Warning

⬇ 1 HTML

1 **W619** - Unrecognised value for the 'name' attribute. The 'name' attribute in the <meta> element is restricted to values documented in the HTML5 specification with extensions in the WHATWG Wiki. Note that Total Validator will not recognise changes to the wiki after its release date. So, you will have to wait until the next release of Total Validator before new names are recognised, or (Pro version only) use the 'Edit meta names' option to add them yourself. See [Meta Extensions](#).
